DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to FPGA, classified in class 326, subclass 39.
- II. Claims 15-16, drawn to a crossover switch, classified in class 326, subclass 38.
- III. Claims 17-20, drawn to a logic block, classified in class 326, subclass 113.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the FPGA of Group I could use any crossover switch. The subcombination has separate utility such as a particular crossover switch for use in variety of other circuits.

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as

claimed because the FPGA of Group I could use any logic block. The subcombination has separate utility such as a particular logic block for use in variety of other circuits.

Claims 9-14 are considered to be drawn to a combination of the inventions of Groups I and II; and I and III. Thus, these will be held in abeyance in accordance with MPEP §806.05(c)(3), until the allowability of the elected invention is determined. Upon allowance of the claims of the elected invention, these claims will be rejoined and allowed if amended to include all the limitations of the allowed elected claims.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II or III, restriction for examination purposes as indicated is proper.

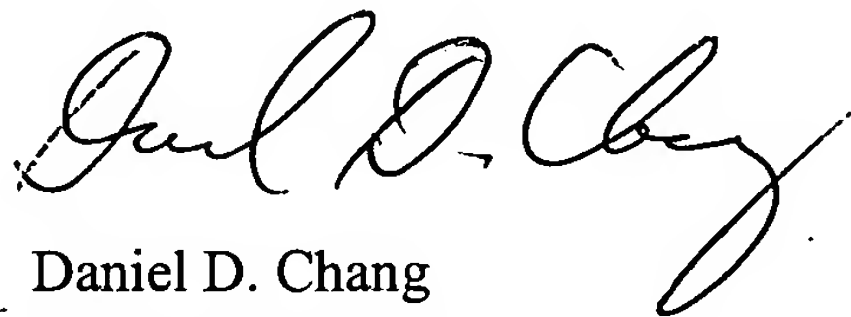

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel D. Chang whose telephone number is (571) 272-1801. The examiner can normally be reached on Monday through Friday.
